Description:

Tutorial: how to make a 4-block quilt, log-cabin style

DESIGNED BY Gracewood Stitches

How about displaying your cross stitched works as a quilt?

Designer Kathy Bungard takes us step by step, showing how to assemble 4 patterns of her design into a small quilt. The charts, sold separately (see below) are from the Traces of Lace collection and are all of identical size.

You can use this tutorial to assemble any stitched designs, provided they are the exact same size. They don't even need to be square. This tutorial shows instructions for 2 x 2 squares. You can use the same method to assemble more squares, say 2 x 3 or 3 x 3.
