## Biscornu tutorial: assembling a biscornu with contrasting material

*This tutorial is for your own personal use.  
It is NOT to be published on blogs, albums or any site without permission..*

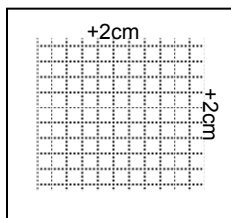

Model stitched on DMC 14 count Aida Metallic Gold / beige – ref: DC 28–5282 using DMC Metallic threads.  
This material has strands of gold glitter ingrained in which is lovely for Christmas designs.

The chart is available at [www.creativepoppy.com](http://www.creativepoppy.com)

1

Embroider the design as per the chart allowing for a seam allowance of at least 2cms. Cut a piece of backing material the same size as the embroidered piece.

2

Lay the pieces RIGHT SIDES FACING TOGETHER. Sew along the top right half (running stitch) in standard sewing cotton.

Left handers - it is probably easier for you to sew from left to right

## Biscornu tutorial:

### *assembling a biscornu with contrasting material*

3

Go round the corner, lifting the backing material & pulling it straight as you sew (pin if necessary). Stick your finger in the corner to keep it from creasing.

Front view

4

Continue around in this manner, matching half of the top to half of the bottom & sewing around as you go. You will see the corners lift and the biscornu shape starting to appear.

5

Leave half of the last side open. Turn right side out & stuff. Oversew closed as invisibly as possible.

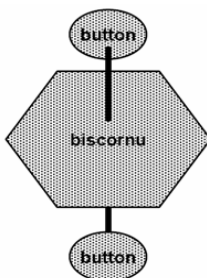

6

Sew through the biscornu, pulling tight to form a dip, attaching a button underneath & a button or bead on the top.
